

6G5Z0023 – Thematic Project

Student ID	21390779
Name	Jean Marc Donald Daly
Team	7-Discord/Twitch Bot
Assessor	Andrew Schofield

Demonstration (25%)

The details below relate to your demonstration mark, which was assessed as a team based on the demonstration video uploaded to Moodle.

What you did well:

You've done a super job with the project and worked well as a team. It seemed like you got your minimum viable product completed nice and early which then left you time to make tweaks, improvements and add-ons. Front-loading a project like this is a good approach as it gives you plenty of slack or buffer time. You've also done a good job with the video which includes a nice tour of the product.

For you to think about:

Adding some slides to the introductory section of the video, rather than showing the code whilst discussing other aspects of the project, would have made it more accessible. These presentation skills are important but also improve with practice. Do be very careful when using copyrighted music or other material in presentations and videos as you do need to follow the rules on how media can be used.

	Find, evaluate, synthesise, and use information from a variety of sources to conduct a professional project	Demonstrate a high degree of professionalism e.g., initiative, creativity, motivation, professional practice, and self-management
Grade Band	70%-85%	70%-85%
Grade Band Criteria	An original project is designed and carried out, with a working minimum viable product demonstrated and presented and complete discussion illustrating a project lifecycle uploaded to Moodle.	Both the project and product are meticulously evaluated and discussed in the presentation with respect to the characteristics of a professional in the students' field.
Demonstration Mark:		75%

Reflection (75%)

The details below relate to your reflection mark, which was assessed as an individual based on the written reflection uploaded to Moodle.

What you did well:

A good, reflection with some honest discussion of what went well and not so well during the project and your own strengths and weaknesses. Your role of Lead Developer was an important one and you clearly made a significant contribution to the group project. It was interesting to hear that your group essentially used a hybrid agile/waterfall approach to the project. You'll find that many organisations in industry use a similar approach (despite often claiming to just use agile). It was also great to hear that you've updated your five-year plan based on the development opportunities revealed by the project.

For you to think about:

The reflection does have a few typos. It's always a good idea to proof-read a report before submission. There was also some confusion over questions 1, which was intended to collect your views on the project selection (i.e. before the project began). Likewise the 'Why did you choose this phase?' question in part 2 was to allow you to explain why you thought your team spent the most time in the 'Storming' stage, rather than suggesting that you chose to spend the longest time in that stage. It would be interesting to reflect on where your lead developer role ends and the project leader role begins. You mention "I'm in charge of defining project goals and requirements, as well as creating project deadlines and milestones" but some of these sound more like project lead tasks rather than development lead ones.

	Manage your professional development reflecting on progress and taking appropriate action	Develop working relationships using teamwork and leadership skills, recognising, and respecting different perspectives
Grade Band	70%-85%	70%-85%
Grade Band Criteria	Professional aspirations and action plans are thorough and confidently articulated.	Evidence is shown of ability to exercise leadership skills in a team as either leader or member as needed to complete a project and to reflect on strengths and weaknesses of performance.
Reflection Mark:		72%
